THE
COLLECTION

by Michael Miller

Beauty, warmth, a work of art... discover The Collection

When I imagine my ideal home, I see the perfect blend of form and function, with a fire at its heart that impresses with its design and innovation.

A fire is more than just a source of warmth; it's a statement of style that brings your home to life. That's why we've crafted this stunning collection of unique gas and electric fires designed to offer you the highest quality and superb energy efficiency. They not only look beautiful but work beautifully too.

I'm proud of The Collection and fully confident in its quality, reliability, and durability. That's why I offer a 7 year warranty on gas fires and a 5 year warranty on electric fires.

I hope you enjoy choosing your new fire.

A handwritten signature in black ink, reading "Michael Miller".

Discover our Gas & Electric Fires & Suites

Transform your room with our stunning fires, available in elegant suites, sleek wall-inset designs, and easy-to-install models that require no chimney. Each fire starts as a concept from our R&D team, is approved by leading independent organizations, and crafted with care in our UK facility. Every fire undergoes strict quality checks. Choose from The Collection for a perfect blend of beauty, warmth, and cutting-edge technology.

Every gas fire comes with a 7 year warranty, subject to terms and conditions, offering you peace of mind for years to come. To ensure safe operation and optimal performance, we recommend all gas fires are installed and serviced by a Gas Safe Registered engineer.

Our premium range of Celsi electric fires provides versatile heating for any room in your home simply by plugging into the nearest mains socket. Discover our contemporary styles designed to look sensational and create comfortable controllable warmth.

We are confident you are getting a product that is built to last. That's why we offer a 5 Year warranty across our DLX electric fires range, subject to terms and conditions.

high efficiency

BFM Europe Ltd is renowned for efficient fires and now sets new standards with The Collection by Michael Miller, offering exceptional heat output and lower running costs.

All gas fires in this range feature a glass panel that directs radiant heat from the fuel bed into the room, reducing heat loss through the chimney. This radiant heat is combined with convected heat produced by cool air drawn into the fire through the heat exchanger, and emitted as warm air through the gap above the canopy. Making our gas fires some of the most efficient available.

Many fires in this range have a balanced flue system, perfect for homes without a built-in chimney or flue. These systems vent through an outside wall or roof, with options for horizontal or vertical flue kits, offering flexibility in fireplace location.

More information about balanced flue kits can be found on pages 67.

Product Testing & Certification

All our gas fires are independently tested, approved and verified by the British Standards Institution (BSI) to meet the latest standards for performance, safety and efficiency.

BSI is an independent organisation. They are not owned by the government, industry or shareholders, which means that they can be totally objective with regards testing and certification. This gives their assessments more authority than those of an organization that has a vested interest in promoting its members.

They have some of the most experienced and knowledgeable staff in the world and are recognised internationally for their technical expertise, quality services and in-depth knowledge of gas and electrical product testing and certification.

The wide-ranging capability of their testing facilities and the broad expertise and knowledge of their testing and certification staff ensures our products are rigorously tested with the utmost integrity.

ECODESIGN COMPLIANT

This logo signifies that the product is fully compliant with the Eco design directive Commission Regulation (EU) 2015/1188.

CRAFTED IN BRITAIN

Every gas fire in The Collection by Michael Miller range is developed and manufactured in Britain at our purpose built state-of-the-art facility in Staffordshire.

Da Vinci MD Illumia
Gas Fire Suites

The Da Vinci mid-depth gas fire is now available in three limestone Illumia suites, the classically designed Da Vinci, Giuliano, and the more contemporary Monet, all sure to be the centre of attention in any home. The fire provides highly realistic logs, paired with the latest MM-44 dual-flame burner technology, delivering log burning flame integration.

These suites are available as conventional flue models, suitable for installation into any standard brick chimney or pre-fabricated flue, with a maximum heat output of 6.8kW. Each surround features controllable inset decorative lights, and the fire features include our multi-functional remote control system with thermostatic and timer functions. Non-reflective glass provides an exceptionally clear vision of this most natural and truly vibrant living flame gas fire.

Deluxe Glass, and Black Enamel interiors available.

*A 240V mains electricity supply is required to power the remote control system.

Eden Elite & Slimline BF

Conventional & Balanced Flue Gas Fires

The Eden Elite showcases rustic natural effect logs with lively flames and burning embers aesthetics. This slimline conventional flue wall inset fire is designed to be easily installed into almost any chimney, and is operated by a thermostatic remote control system to perfectly control your level of warmth and comfort.

This luxury fire comes with a black enamel interior lining and can be fitted with or without a fascia. Our designer Panoramic Provence fascia, made from cast aluminium finished in matt black is a stunning new edition for this product. We also have a choice of two Slimline fascias available in a brushed satin silver, or matte black finish.

The balanced flue model is a perfect solution for homes designed without a chimney or flue. This model comes with a slimmer log style with equally attractive tall flames.

Carmelo
Gas Fire

With its large size and enchanting flame picture the Carmelo HE hole in the wall balanced flue gas fire is certainly a show-stopper and it provides exceptional performance too.

If you're looking for luxury combined with exceptional heat output then the Carmelo HE is the ideal gas fire for you. With a viewing area measuring 1145mm along with an enchanting flame picture reflecting in its glossy black enamel interior, this hole in the wall balanced flue gas fire has a heat output of 6.4kW and 75.4% Useful energy efficiency, providing exceptional performance too.

What's more this fire can be installed almost anywhere in the home since it uses a balanced flue system with a choice of horizontal flue, vertical flue or chimney conversion flue kits available to choose from. Both log and white stone fuel effects are supplied with every fire.

*A 240V mains electricity supply is required to power the remote control system.

Passion HE & BF
Conventional & Balanced Flue Gas Fires

Combining efficiency and performance the Passion HE MK3 is a market leading gas fire with the authentic look and feel of natural burning logs. This glass fronted fire is designed with large frame, wide-angle viewing, displaying tall, lively flames that uniquely erupt from each log, creating a stunning fuelbed blaze.

The conventional flue model interior is available in a choice of Deluxe white & stone grey, or glossy black enamel.

Our balanced flue model is a perfect solution for homes designed without a chimney or flue, and is available with a glossy black enamel interior.

For comfort and performance these fires are available with a fully automatic remote-control system. A slide control system is also available with the conventional flue model.

Full accessory listings, including Spacer Frame see page 56-57

Passion HE & BF

Conventional & Balanced Flue Gas Fire Suites

Our Passion Suite combinations merge performance with luxury. The fire provides wide-angle viewing, showcasing superior log ceramics with bright tall flames set against a deep black enamel interior.

For maximum comfort and control we have fitted a fully automatic thermostatic remote control system, for warmth and relaxation at the touch of a button.

A Trim and Fret option, for those who enjoy a more traditional fire setting, couples the highly stylish Signature Trim, with the exclusive Bauhaus 151 Fret.

A one-piece contemporary fascia choice is available with the uniquely designed MM Signature Fascia to creating even more luxury aesthetics between the fascia and the flames.

Three popular colour finishes are available in Black Nickel, Chrome, and Brass.

WARNING

BFM Europe Limited is a Gas Safe Registered company. We recommend that all of our fires are installed by Gas Safe Registered engineers in accordance with our instructions.

DISCLAIMER

Our policy is one of constant development and improvement. We therefore reserve the right to revise designs and specifications of our products without formal notice, patents pending. We always recommend our products be viewed in an approved showroom before purchase.

Whilst we have taken every care in the preparation of this brochure it is not intended to replace the installation manual which provides more detailed information.

Photography is for illustration purposes only and although every effort has been made to ensure accurate reproduction of typical installations and flame pictures they may vary according to fire model and flue types.

We accept no liability for any loss or damage arising directly or indirectly from the use of this brochure. We recommend that all our fires are used in conjunction with central heating and not as a primary source of heat. In the interests of personal safety a suitable fireguard is recommended when children, the elderly and the infirm are present.

This brochure must not be reproduced in whole or in any part without prior written permission.
