GAS FIRES 2025

Kohlangaz 5 Year Warranty

MADE IN BRITAIN

# Welcome

At Kohlangaz we know how important it is to create a stylish and relaxing living environment. That's why we've developed this collection of versatile and affordable gas fires to complement all tastes and lifestyles.

I believe our success stems from a combination of innovative design, investment in technology and the highest quality manufacturing standards. As a result all Kohlangaz fires carry a 5 year warranty to reflect my belief in their quality and durability.

Our experienced Kohlangaz retailers are hand-picked to give you the very best advice and service.

This brochure has been designed to make the purchase of your new Kohlangaz fire as simple as possible. I hope you will find it both informative and inspiring.

Today BFM Europe is the fastest growing domestic fire producer in the country with an unequalled reputation for quality and services.

Every Kohlangaz branded gas fire is developed and manufactured in Britain at our purpose built, state-of-the-art facility in Stoke-on-Trent.

Unleash Your Fire's Style	
Fascias, Trims, Frets	51

All Kohlangaz gas fires carry the peace of mind of a 5 year Warranty subject to terms and conditions.

# **bsi.** Product Testing & Certification

Kohlangaz fires are independently tested, approved and verified by the British Standards Institution (BSI) to meet the latest standards for performance, safety and efficiency.

BSI is an independent organization, free from government, industry, or shareholder influence. This objectivity enhances the authority of their assessments compared to those from organizations with vested interests.

With world-renowned expertise in gas and electrical product testing and certification, BSI boasts highly experienced staff and internationally recognized capabilities. Their extensive testing facilities and in-depth knowledge ensure our products undergo rigorous and impartial testing.

Compliant with the Eco design directive Commission Regulation (EU) 2015/1188.

Tested & Approved
Conforms to GB legislation

# highefficiency

# Get up to 93.5% energy efficiency from your gas fire...

Kohlangaz fires have set new industry standards with the introduction of the high efficiency range: exceptional heat output combined with lower running costs compared to standard gas fires or electric fires. Our team has invested in developing innovative technology to create energy-efficient gas fires, ultimately helping consumers reduce their energy costs and save money on their bills.

#### Conventional Flue Fires

#### Glass Fronted Fires

Our high-efficiency conventional flue fires deliver up to 86.3% energy efficiency. A front-facing glass panel maximizes radiant heat output from the fuel bed, directing it into the room while minimizing chimney losses. Additionally, convected heat is generated as cool air is drawn into the fire's base through the heat exchanger and emitted as warm air above the canopy.

#### **Open Fronted Fires**

Our high-efficiency open-fronted fires offer up to 68.3% energy efficiency while replicating the look and feel of a traditional open fire. These fires provide both radiant heat emitted from the coal-effect fuel bed and convected heat generated by cool air drawn into the base, passing through a heat exchanger, and emitted as warm air above the canopy.

#### Balanced Flue Fires

#### Glass Fronted Fires

Our high-efficiency balanced flue fires offer up to 93.5% energy efficiency, perfect for homes without existing chimneys or flues. These fires feature a self-contained flue terminal that vents directly through an outside wall. As completely room-sealed appliances, they draw and vent external air for combustion through a pair of co-axial tubes, ensuring safe and efficient operation.

# Marbury 3.1kW - Pages 40-41

# standardfires

#### Conventional Flue Fires

#### Open Fronted Fires

Standard fires can achieve a direct heat output of up to 3.1kW. It is recommended that these products are not suitable for use as a primary heat source, but are ideal if you are looking for a great fireplace feature for occasional use.

# Before you begin

#### Type of Chimney or Flue

The type of fire you can install depends on your chimney or flue. If unsure, consult the simple guide below or compare your roof type. Note: Full-depth fires typically require a traditional chimney or a rebate on the fire surround, while slimline fires are compatible with most chimneys or flues

#### **Brick Chimney**

Apart from products designed for "no chimney" applications, all Kohlangaz products will fit brick chimneys. They are easily recognisable by a chimney stack with accompanying terracotta pot or gas terminal.

#### Pre-Fabricated Flue

Pre-fabricated flues are easily identifiable by a metal flue and terminal on the roof and a metal flue box behind the fire.

#### Pre-Cast Flue

Pre-cast flues can be identified by a ridge vent or metal flue tube and terminal on the roof. Constructed from concrete or clay blocks they form a rectangular section flue. All Kohlangaz fires featuring this icon are only suitable for pre-cast flues conforming to BS EN 1858.

# Can't see a Chimney or Flue?

If you can't see a chimney or flue like the ones described above, then you will require a Balanced Flue fire.

#### Balanced Flue

Balanced Flue fires use a horizontal pipe to vent directly outside. An electricity supply is not required for Balanced Flue products.

#### Controls

Manual Control
A simple and discreet control
system located behind the fire's
fascia or fret on inset fires.

Slide Control
Convenient control that

eliminates the necessity of bending down.

Easy Flame Control (EFC)
Discreet, easy access buttons
are used to ignite the fire and
adjust heat and flame height.

Remote Control
The remote control handset is

used to light the fire as well as to adjust the flame height and heat output.

Remote Control with Thermostat

The remote control handset can be used to light the fire as well as to adjust the flame height and heat output. In addition, the handset contains the extra benefit of a thermostatic control to regulate room temperature.

#### Gas Supply

Every fire in this brochure is available in natural gas, and a selection are available in LPG.

#### Natural Gas

If you have a gas meter then you will have natural gas.

#### LPG

LPG is the most popular alternative to natural gas.

#### **Fuel Bed Effects**

#### **Back Panels**

# Volantra XT

# highefficiency

**Conventional Flue** Suite- Glass Fronted

The perfect blend of modern design and classic elegance. This Limestone surround pairs beautifully with the Volantra XT gas fire. Its sleek lines and gentle curves create a striking focal point that complements any interior style.

The gas fire features our latest Integrated Flame Burner Technology, delivers a captivating display of natural flames with powerful heat output. This stunning high performance suite offers both luxury and functionality, creating a cozy and inviting atmosphere.

### **IMPORTANT NOTICE**

WARNING BFM Europe Limited is a Gas Safe Registered company. We recommend that all of our fires are installed by Gas Safe Register engineers in accordance with our instructions.

DISCLAIMER Our policy is one of constant development and improvement. We therefore reserve the right to revise designs and specifications of our products without formal notice, patents pending. We always recommend our products be viewed in an approved showroom before purchase. Whilst we have taken every care in the preparation of this brochure it is not intended to replace the installation manual which provides more detailed information. Photography is for illustration purposes only and although

every effort has been made to ensure accurate reproduction of typical installations and flame pictures they may vary according to fire model and flue types. We accept no liability for any loss or damage arising directly or indirectly from the use of this brochure. We recommend that all our fires are used in conjunction with central heating and not as a primary source of heat. In the interests of personal safety a suitable fireguard is recommended when children, the elderly and the infirm are present.
