<u>Decorative Flue Pipe kit installation instructions – bioethanol stove</u>

1). Initially you must install the magnetic base as shown in figure 1, also note that the magnetic base of the pipe must be placed centrally on the outlet vent, with the outer ring of vent uncovered as shown in detail B.

2.) Secondly you can construct the pipe in any of the following configurations below to suit the desired installation and aesthetic. Refer to the instruction manual for the bioethanol stove for the minimum clearances to the rear of the stove, then adjust the pipe to achieve this.
